Objective

To secure a challenging and rewarding position as a fresher, where I can utilize my educational background, passion, and enthusiasm to contribute to the growth and success of the organization. I am eager to apply and further develop my skills, gain valuable work experience, and collaborate with a dynamic team in a professional environment that promotes learning and personal development.

EDUCATION

Bachelor of Technology, Information Technology   *2019 - 2023*
(University School of Information and Communication Technology, GGSIPU)   *7.895 CGPA*

XII – NEB Board   *2017 - 2018*
Arniko higher secondary school   *65%*

PROJECTS

1. Sign-Up Form Page
  - Developed a web page using HTML and CSS to create an efficient and user-friendly sign-up form.

2. Online Grocery Landing Page
  - Crafted a comprehensive professional dashboard design employing HTML and CSS. Utilized advanced grid and layout techniques, incorporating nesting for optimal visual presentation.

3. Podcast Landing Page
  - Engineered a book collection management system, allowing users to seamlessly add, remove, and update books within a user-friendly interface.
  - Leveraged HTML5 and CSS for the project's development.

4. Metaverse Landing Page
  - Solely designed and constructed a captivating landing page for the Metaverse project.
  - Developed the page using HTML5 and CSS for a visually engaging user experience.

5. Blood Bank
  - Spearheaded the development of a crucial Blood Bank system as a major project, tailored to serve hospital needs. This system effectively stores data on blood donations within a three-month period and maintains a roster of potential donors.
  - Employed a robust technology stack, including HTML, CSS, JavaScript, and MySQL as the database, ensuring secure and efficient data management.

SKILLS

HTML   CSS   JavaScript   Bootstrap   ReactJs
MySQL   C++
